Mazharul Islam Hridoy

TL & Sales Operations Manager · Proshanti Shop, Dhaka
mazharulhridoy.pro@gmail.com · linkedin.com/in/mazharulhridoy · mazharulhridooy.github.io

I run a cash-on-delivery sales floor, and I built the software it runs on.

I own the targets, the courier numbers and two shifts across a 15-hour day. When the tools got in the way, I built better ones.

PROshanti CRM: one system for the whole order

Calling automation	A shared dial queue decides who gets called next, and agents work it from a browser phone on our own Asterisk system.
Orders and fraud	Scores every order on 14 signals and holds the risky ones before a courier fee is spent.
Couriers and delivery	Steadfast, Pathao and Paperfly in one place, so carriers can be compared without three dashboards.
Cash and ad spend	COD reconciliation checks what couriers pay us against what our records say they owe, month by month.
Customers and chat	Customer history sits behind every call and order, and WhatsApp, Messenger and Instagram come into one Live Chat inbox.
Team performance	KPIs score orders weeks after confirmation, so an order that comes back doesn't count as a win.

Where I've worked

Mar 2026 – Present

TL & Sales Operations Manager

Proshanti Shop, Dhaka

- Own sales targets, conversion rates and daily output across two shifts and a 15-hour operating day
- Built and rolled out the in-house CRM that now handles orders, couriers, calls and team performance
- Moved the call center to a browser softphone on our own phone system, with call logs and recordings
- Built Smart Calling, a shared dial queue that sets who gets called next and stops two agents ringing one customer
- Run courier performance reporting across Steadfast, Pathao and Paperfly
- Automated multi-file reporting with Power Query, replacing manual consolidation with a single refresh
- Trained the team on the CRM and documented task ownership, so daily output doesn't depend on direct supervision
- Set up role-based CRM access, so sales staff see masked customer addresses instead of the full record

Feb 2024 – Dec 2025

Junior Coordinator, Operations

BYSL Global Technology Group

- Managed competing operational priorities against commercial deadlines
- Built cross-functional practices that improved task accuracy and workflow consistency

Dec 2022 – Mar 2024

IT Operations

Oikko, IT Wings

- Introduced proactive monitoring and alert workflows, cutting operational downtime by 15%
- Kept networks stable and data intact under daily production load

2021 – 2023

Marketplace Manager

Independent, digital commerce

- Ran three online marketplace shops at once, owning sales, inventory and customer management
- Kept lead-conversion data and customer records accurate across every platform

What I bring

Running operations	Systems	Data and selling
Sales targets and conversion	CRM design and rollout	Advanced Excel and Sheets
Shift and coverage planning	Role-based access control	Microsoft Power Query
Courier performance	Call center automation	Inventory systems
Team leadership and KPIs	Networking and troubleshooting	Consultative sales and retention
